

Bachelor of Science in Crop Production

-- Guidelines for Majors --

A University of Arizona Major
within the College of Agriculture and Life Sciences
coordinated by the

**Department of Plant Sciences and the
Department of Soil, Water and Environmental Science**

2009 - 2010

www.ag.arizona.edu/swes

Revised September 2009

SCHOLARSHIPS

(Amounts may vary from year to year)

Fuller, W.H.

- Grad or undergrad in SWES with service to agriculture in Arizona
- Demonstrating academic excellence, good character, and professional promise
- Nominated by Soil, Water and Environmental Science, Department Head, with approval by OSFA

Buehrer, T.

- Grad or undergrad in soil and water science or environmental science
- Demonstrating academic excellence AND leadership
- Named by Dean with approval by OSFA

Smith, H. Schol

- Upper division undergrad in environmental, engineering or nutritional science
- Sub-committee nominates, Named by Dean with approval by OSFA

Ben Avery Award, Soil and Water Conservation Service (SWCS)

- Undergrad in soil or water science-related field
- Must be an Arizona resident
- Junior or Senior the year Scholarship is awarded
- Minimum GPA of 2.5

Jones, Geo

- Grad or undergrad (upper division) in Crop Production
- Financial need and at least 3.0 cumulative GPA
- Named by Dean with approval by OSFA

Alcorn, Stanley

- Junior/Senior in CALS majoring in plant sciences, plant pathology, agronomy, entomology, soil, water/environmental sciences
- Financial need may be considered
- Candidates must demonstrate academic merit
- Selected by Schol. Committee of College of Ag or faculty of various academic depts. Campaign AZ

Stith, Lee S.

- Junior/Senior in CALS majoring in plant sciences, plant pathology, entomology, soil, water/environmental sciences
- Financial need may be considered
- Candidates must demonstrate academic merit

Arizona Vegetable Growers Association

- Students studying agronomy
- Must be an Arizona resident

Boswell, JG

- Based on academic merit
- Crop Production/Agronomy majors only

B.S. Degree in Crop Production University of Arizona

Agronomic science (agronomy) is defined as the combination of crop and soil sciences principles and practices. At the University of Arizona in the College of Agriculture and Life Sciences (CAL S), the Plant Sciences (PL S) and Soil, Water and Environmental Science (SWES) departments provide the base courses required for an undergraduate degree in crop production. Because of this, the UA Crop Production program is directed and managed by both the SWES and PLS departments.

This undergraduate program provides a solid foundation for students entering a career in modern agriculture and crop production. This degree program provides a good base for students interested in work associated with field crops, permanent tree crop production, turf science, and/or a broad array of horticultural crops that are grown throughout the western United States and other regions in the world. Due to the flexible nature of this program, students can elect to focus on either Agronomy or Turf Science. Fundamentals derived from this program can be applied to crop production systems and land management programs locally, regionally, or globally. Also, graduates from this program will be well prepared academically to enter graduate degree programs.

Descriptions of the Departments

Plant Sciences and Plant Pathology/Microbiology:

The PL S Department includes the Division of Plant Pathology and Microbiology. Both units foster research, instruction and outreach programs that study the way plants grow and how they interact with their environment. Plant Sciences has faculty performing basic research on plant anatomy, development, physiology, genetics and environmental responses. Cooperative Extension faculty work statewide to assist the agronomic and horticulture industries. Course work includes a wide variety of subjects important to understanding and improving plants for human use and enjoyment. Further information can be found at: <http://ag.arizona.edu/pls>

The Division of Plant Pathology & Microbiology maintains instruction programs and conducts research on the molecular, cellular, organismal and ecological aspects of plant diseases. This includes work in the areas of crop production, turf science, natural resources and food safety. Further information can be found at: <http://ag.arizona.edu/PLP/plphome.html>

Soil, Water and Environmental Science:

The SWES Department has 31 faculty members, including Cooperative Extension specialists working statewide to promote agricultural science, and researchers working at various Agricultural Research Centers. The department places an educational and research emphasis on soil/nutrient/water/plant dynamics, soil salinity, and crop production, as well as environmental and soil biology, chemistry, microbiology, physics, pollution, and technology. Further information can be found at: <http://ag.arizona.edu/swes>

Overview of Major

A. General Education.

This coursework gives undergraduates a diverse academic background to complement each major. It is divided as follows:

1. Foundation Courses:

English Composition	6 units
Mathematics (satisfied by MATH 124/125)	

2. Pre-Major:

Communications (satisfied by SWES 408)

3. Second Language

Second semester proficiency variable

4. Tier 1

Traditions and Cultures 6 units

Individuals and Societies 6 units

5. Tier 2

Humanities 3 units

Arts 3 units

Individuals and Societies 3 units

B. Core Basic Science.

This coursework gives a solid foundation in science and math. The general principles and specific analytical techniques in these classes are directly applicable to crop production.

C. Core Soil and Water Science.

These classes provide in-depth coverage of soil physical and chemical characteristics, and soil/water interactions. Students will learn how to maintain soil for optimum plant growth, and to diagnose and treat suboptimal soil conditions.

D. Core Plant Science.

These classes present biological, chemical, and physical characteristics of plants and their interaction with the environment. Students will be able to identify plant requirements under different conditions.

E. Focal Area.

This coursework enables students to specialize in Agronomy or Turf Science.

F. Additional Courses.

Classes in this section provide miscellaneous supporting skills necessary for crop production, including irrigation design/maintenance, economics, and technical writing.

COURSEWORK	SEMESTER	UNITS
A) GENERAL EDUCATION	I, II	33
B) CORE BASIC SCIENCE		
CHEM 151, 152 General Chemistry	I, II	8
CHEM 241a Organic Chemistry	I, II	3
MATH 124 or 125 Calculus I	I, II	3-5
MATH 263 Statistics	I, II	3
MCB 181R Introductory Biology	I, II	3
PHYS 102 Introductory Physics	I, II	3
TOTAL		23-25
C) CORE SOIL AND WATER SCIENCE		
SWES 200/201 Introduction to Soil Science	I, II	4
SWES 316 Soil Fertility and Plant Nutrition	II	3
SWES 401 Management of Arid Lands and Salt-Affected Soils	II (alt. years)	3
SWES 431 Soil Genesis, Morphology, and Classification	I	3
SWES 420 Environmental Physics OR SWES 470 Soil Physics	I or II	3
TOTAL		16
D) CORE PLANT SCIENCE		
PLS 240 Plant Biology	I	4
PLS 312 Plant Genetics	II	4
PLS 360 Principles of Plant Physiology	I	3
PLS 405 Weed Science	I	3
TOTAL		14
E) FOCAL AREA (choose either Agronomy or Turf Science)		
PLS 306 Crop Science & Production (Agronomy Focus)	I	3
Electives (Agronomy Focus; to include at least 5 upper division units)		9-10
PLS 270 Golf & Sport Turf Management (Turf Science Focus)	II (odd years)	3
PLS 355 Turfgrass Management (Turf Science Focus)	I	3
PLS 455 Turfgrass Science: Env. Stress (Turf Science Focus)	I	3
AGTM 330 Turf and Landscape Technology (Turf Science Focus)	II (even years)	3
TOTAL		12-13
F) ADDITIONAL COURSES		
ASM 404 Irrigation Principles and Management	I, II	3
ECON 201a Principles of Economics	I, II	3
AREC 217 Resources & Environmental Economics (or AGTM 213)	I	3
SWES 408 Scientific Writing for Env., Ag. & Life Sciences	II	3
ENTO 468 Insect Pest Management	II	3
PLP 305 Introductory Plant Pathology	I	3
TOTAL		18
TOTAL		120

Crop Production Minor

Students may select a Minor in Crop Production while having a different Major. Twenty two units are required, even if the major department guidelines differ. Nine units must be unique to this minor.

COURSEWORK	SEMESTER	UNITS
A) GENERAL SCIENCE COURSES		
UNVR 195A Careers in Crop Production	I	1
CHEM 151 General Chemistry	I, II	4
SWES 200/201 Introduction to Soil Science	I, II	4
PLS 240 Plant Biology	I	4
TOTAL:		13
B) UPPER DIVISION COURSES (SELECT 9 UNITS)		
Students select relevant upper-division courses in consultation with an Advisor (ASM, PLP, PLS, RNR, and SWES courses)		
TOTAL:		9
TOTAL:		22

Resources for the Crop Production Major and Minor

Advising.

Advisors provide guidance for selecting and scheduling coursework for students throughout their academic program, and help students procure internships and jobs at graduation. Students are highly recommended to maintain contact with their advisors at least once a semester. They are there to help!

Plant Sciences Advisor:

Elizabeth Davison
Lecturer & Undergraduate Coordinator,
Director, UA Campus Arboretum
Forbes Building, Rm 317
(520) 621-1582
edavison@ag.arizona.edu

Soil, Water and Environmental Science Advisor:

Thomas B. Wilson, Ph.D.
Lecturer
Family and Consumer Sciences
Building, Rm 308
520-621-9308
twilson@ag.arizona.edu

Class Locations.

Coursework takes place on the campus of the University of Arizona, at the Campus Agricultural Center (<http://cals.arizona.edu/general/departments/cac.html>), and at other locations in Arizona.

Clubs.

Undergraduate clubs provide support and activities for students outside of the classroom. Club activities allow students to gain supplemental experience relevant to their major in an informal, friendly environment. For more information, visit the SWES Club website at: <http://www.ag.arizona.edu/clubs/swesclub/>

Crop Production Major's Schedule Planning Worksheet

FIRST SEMESTER (Fall)				SECOND SEMESTER (Spring)			
Recommended		Your Schedule		Recommended		Your Schedule	
Tier I course	3			Tier I course	3		
ENGLISH	3			ENGLISH	3		
MATH	3			CHEM 152	4		
CHEM 151	4			SWES 200	3		
ECON 201a	3			SWES 201	1		
TOTAL	16	TOTAL		TOTAL	14	TOTAL	

THIRD SEMESTER (Fall)				FOURTH SEMESTER (Spring)			
Recommended		Your Schedule		Recommended		Your Schedule	
Tier I course	3			Tier I course	3

Crop Production Degree Expected Outcomes

1. Have an appreciation and knowledge of the physical Earth.
2. Understand the relationship of Crop Production to other areas of science and to society in general.
3. Integrate and apply the general principles of crop production to specific crop production systems.
4. Develop an awareness of the history, current conditions, and future challenges associated with crop science and production on a local and global scale.
5. Understand soils as natural entities and the factors of soil formation and erosion.
6. Understand important physical, chemical, and biological properties of soil and water.
7. Apply the basic principles of botany and plant biology to crop science.
8. Understand the functioning of nutrient cycles in terrestrial and aquatic systems.
9. Understand how to describe soils and soil profiles in the field, and relate field-observed properties to proper use of soils.
10. Understand how to properly collect soil and water samples, identify and implement appropriate analytical techniques, and interpret results.
11. Think critically as demonstrated by evaluating information from multiple perspectives, drawing reasonable conclusions, and defending them rationally.
12. Be able to create a hypothesis, design an experiment to test that hypothesis, analyze the results, and draw appropriate conclusions.
13. Communicate effectively both orally and in writing.
14. Be proficient in writing a technical report or proposal in the field of soil and crop science.
